**Working Frequency:**
- 600 KHz

**Patient Circuit:**
- F

**Selectable Input Voltage:**
- 115-230 Vac

**Mains Frequency:**
- 50-60 Hz

**Electrical Input Power:**
- 230 VA
- 300 VA

**Size WxHxD mm:**
- 254x104x288

**Weight:**
- 5 Kgs

Possibility of use for minimum invasive surgery
Possibility of use of bipolar forceps
Possibility of use of split neutral electrodes
Planning of the working conditions
Memorization of the last used settings
Activation of the monopolar power with pedal and/or handle
Digital regulation and indication of the output power
Adjustment of the acoustic indicator intensity

**High performances in compact size**
SURTRON is a high frequency electrosurgical equipment which is suitable to light and medium surgery.

SURTRON, through its performance, allows pure CUT, cut-coagulation BLEND, superficial coagulation FORCED COAG, deep coagulation in absence of necrosis SOFT COAG and, with a special adapter, BIPOLAR coagulation. The digital reading of delivered power and the monitoring of operative function by microcontroller guarantees the absolute reliability of working conditions.

SURTRON allows a highly professional surgery thanks to the user-friendly and safety solutions normally used. The connection of neutral electrode is constantly monitored. Safety control of patient/plate contact using split neutral electrode. The possibility to control by the handle the monopolar output functions as well as the delivery of output power, allows to implement the surgical operation without turning away the surgeon attention from the surgical field.

SAFETY
- EN60601-1
- EN60601-1-2
- EN60601-2-2
- Electrical Class: I CF
- MDD 93/42/EC Class: II b

CONTROLS
- Patient/Plate circuit monitoring
- Output power monitoring
- Self check control
Standard Composition:
- Reusable handle with switches F4243
- Assorted electrodes (10 pcs) 00500.00
- Cable for neutral electrode 00404.08
- Steel neutral electrode 5365
- Foot switch 00300.00
- Power supply cable 2 mt 00100.03
